ERIC ALBRIGHT received his MA in Applied Linguistics from GIAL (Graduate Institute of Applied Linguistics, Texas) in 2000, and earlier, worked as a software developer. Joining SIL International, he worked among the Bidayuh of Sarawak, Malaysia from 2001-2003, advising them in the fields of literacy, orthography development and lexicography. In 2006, he co-founded Payap Language Software, part of the Linguistics Institute at Payap University in Thailand.

I WAYAN ARKA is a Fellow in Linguistics at the Research School of Pacific and Asian Studies (RSPAS) at The Australian National University. He received his PhD from Sydney University in 1999. He returned to Udayana University in Bali-Indonesia for three years before he moved again to Australia (in April 2001) to take up a fellowship at the RSPAS, ANU. Wayan's interests are in descriptive, theoretical and typological aspects of Austronesian languages of Indonesia. His recent books published by Pacific Linguistics are *Balinese Morphosyntax: A lexical-functional approach* (2003) and *The many faces of Austronesian voice systems: some new empirical studies*, co-edited with Malcolm Ross (2005). Wayan is currently working on a number of projects including research on voice in the Austronesian languages of eastern Indonesia (funded by an NSF grant, 2006-2009, in collaboration with Matt Shibatani and Fay Wouk), and a large-scale machine-usable grammar, dictionary and corpus of Indonesian (funded by an ARC Discovery grant, 2008-10, in collaboration with Jane Simpon, Avery Andrews and Mary Dalrymple). He has done extensive fieldwork for his Rongga Documentation Project (funded by the ELDP, 2004-6), and organised capacity building programmes for language documentation, maintenance and revitalisation in Indonesia.

PETER K. AUSTIN joined SOAS in October 2002 as the Märit Rausing Chair in Field Linguistics and Director of the Endangered Languages Academic Programme. Earlier, Peter held a Humboldt Prize at Frankfurt University and was Foundation Professor of Linguistics at the University of Melbourne (1996-2002). Peter's research interests cover descriptive, theoretical and applied linguistics. He has extensive fieldwork experience on Australian Aboriginal languages and since 1995 has been researching Sasak and Samawa, Austronesian languages from Lombok and Sumbawa islands, eastern Indonesia. His theoretical research is mainly on syntax and focuses on Lexical Functional Grammar, morpho-syntactic typology, theory and practice of language documentation and multi-media for endangered languages. He has also published on historical and comparative linguistics, typology, and Aboriginal history and biography.

HUI-HUAN ANN CHANG received her MA in linguistics from the Department of English Language, Literature, and Linguistics, Providence University. She has been a research assistant in various Yami projects since 2002, coauthoring papers and providing computer support. Her research interest is in interlanguage variation with a special focus on phonological acquisition. She has co-authored with Victoria Rau "A tale of two diphthongs in an indigenous minority language", a paper in Stanford and Preston's co-edited anthology on *Variationist Approaches to Indigenous Minority Languages* (forthcoming).

GIA-PYNG CHEN is a lab manager in the College of Informatics, Providence University. Her research interests are database management and web applications.

HSIN-TA CHOU is a graduate student majoring in Computer Sciences and Information Management at Providence University. His research interests are animation and database management.

MAA-NEU DONG is a board member of the Committee of Yami language certification at the Council of Indigenous Peoples in Taiwan. As a native speaker of Yami, she has published since 1989 journal articles on translations of Yami folklores and ceremonies, and a collection of Yami traditional songs “Praising on Taro” (1995). She has collaborated with Victoria Rau on Yami Textbook (2000), Yami Texts with Reference Grammar and Dictionary (2006), and papers on “Yami reduplication”, “Endangered language documentation and transmission”, and “A tale of two diphthongs in an indigenous minority language”. Her current research is on a Yami Dictionary project.

MARGARET FLOREY is a Senior Lecturer in the Linguistics Program at Monash University. She received her PhD in Linguistics from the University of Hawai’i at Manoa (1990). Margaret’s research interests include the minority languages of the Austronesian and Australian language families, language endangerment, ethnography, ethnobiology, and anthropological linguistics. Margaret has extensive fieldwork experience in Central Maluku, eastern Indonesia, and in Western Australia. She is currently coordinating a collaborative research project which is documenting four endangered Moluccan languages, both in the Indonesian homeland and in the Dutch diaspora. In addition to language documentation, Margaret is involved in capacity building with linguists and community language activists in Indonesia, the Netherlands and Australia. She is a co-founder of the Resource Network for Linguistic Diversity, serves on the Board of Governors of Terralingua, and chairs the steering committee for the International Conference on Austronesian Linguistics. Margaret also contributes as an international expert at the UNESCO Intangible Cultural Heritage Section Experts’ Meetings on the Convention on Intangible Cultural Heritage.

HUEY-SHIUAN GUO is a teaching assistant of Department of Computer Sciences and Information Management, Providence University, Taiwan. Her research interests are database management and web applications.

JOHN HATTON worked in Apple Computer’s Advanced Technology Group before joining SIL International in Papua New Guinea in 1997. There he served as a language software consultant and developer, working with both expatriate linguists and nationals interested in developing their own languages. He lived (and developed software) among the remote Edolo people for two years while his wife helped them start adult literacy programs. In 2006 he moved to Thailand to co-found Payap Language Software. John holds a Master’s Degree in Computer Science from the University of California, San Diego.

FUHUI HSIEH received her Ph.D. in linguistics from National Taiwan University. Her research interests are in syntax, semantics, and Austronesian linguistics. She has co-authored with Shuanfan Huang “Grammar, construction, and Social Action: A Study of the Qishi Construction (2005)”, published in *Language and Linguistics*, and “The Pragmatics of Case Marking in Saisiyat” (2006), published in *Oceanic Linguistics*.

SHUANFAN HUANG is Professor of Linguistics in the Graduate Institute of Linguistics at National Taiwan University. His particular research interests focus on the discourse basis of syntax, cognitive semantics and Austronesian linguistics.

LAHWY ICYEH is a member of the Smangus village of the Atayal people in Taiwan. He is currently a masters student of the Institute of Ecology, Providence University. His research interests include ethnobotany, traditional territory mapping, eco-tourism and self-governing natural resources management. He is an active member in promoting traditional territory mapping and self-governance for the Atayal people. Particularly, he is dedicated to the revitalization of Atayal people’s traditional knowledge in the modern context.

DA-WEI (DAYA) KUAN is a member of the Atayal people in Taiwan. He received his MA in ethnology from National Cheng-Chi University. He is currently a PhD candidate in the Department of Geography, University of Hawaii at Manoa, and also an indigenous visiting researcher (2007) in the Institute of Ethnology, Academia Sinica, Taiwan. Daya’s research interests include the relations between modernity and indigeneity, political ecology and indigenous community mapping. He has been participating in the projects of Taiwan indigenous traditional territory survey and community mapping since 2003.

YI-HUI (JASMINE) LIN received her MA in linguistics from the Department of English Language, Literature, and Linguistics, Providence University. Her research interest is in sociolinguistics with a special focus on language shift and the linguistic vitality of Yami.

YIH-REN (OLIVER) LIN received his Ph.D. in Geography from University College London. As a cultural geographer and ecologist, his research interests are traditional ecological knowledge, participatory action research methodology, and political ecology. He is actively involved in projects of revitalizing Taiwan’s indigenous peoples’ culture, which include Indigenous peoples’ traditional territory mapping and a community-based digital local knowledge database. His most recent publications include a paper (2007) on “The Chief Seattlization of Nature Conservation in Taiwan: A Radical Perspective on Indigenous Traditional Ecological Knowledge.” in *Chung Wai Literary Quarterly*. He is making a film in collaboration with local Atayal communities. This film is based on Atayal traditional ecological knowledge and will be the first one spoken in Atayal and played by community members in Taiwan.

J. STEPHEN QUAKENBUSH has served as a linguist/translator with the Agutaynen language community of Palawan, Philippines (1984-1997), and as Director of SIL Philippines (1997-2001). Since 2003, Steve has been Academic Services Coordinator for SIL in

Asia. His interests are in the linguistics and sociolinguistics of Agutaynen, and of Austronesian more generally. Representative publications include his 1986 Georgetown University Ph.D. dissertation *Language use and proficiency in a multilingual setting* (published in 1989 by the Linguistic Society of the Philippines) and an article entitled “Word order and discourse type: an Austronesian example” in Doris L. Payne (ed.) *Pragmatics of word order flexibility* (1992, John Benjamins).

PHIL QUICK completed his PhD in linguistics in 2004 at the Australian National University, and has worked in Sulawesi, Indonesia since 1987. He has a book in press with Pacific Linguistics, ‘A Grammar of the Pendau Language’, and has published about 20 articles on the Pendau language in English and Indonesian. He has been a member of SIL International since 1983, and serves as a translator, linguist and linguistics consultant for the Indonesia Branch. Phil has been working with the Pendau language team to publish vernacular materials. A book on ten Pendau folktales is also forthcoming.

D. VICTORIA RAU received her Ph.D. in linguistics from Cornell University. Her research interests are in Austronesian linguistics, sociolinguistics, and applied linguistics. Her most recent publications include two websites on Yami Language Documentation (2005-2007), a monograph on Yami Texts with Reference Grammar and Dictionary (2006), and “A tale of two diphthongs in an indigenous minority language”, a paper in Stanford and Preston’s co-edited anthology on *Variationist Approaches to Indigenous Minority Languages* (forthcoming). She was a visiting scholar at CARLA, University of Minnesota (2003-2004), and is currently taking her sabbatical leave from Providence University at the English Language Institute, University of Michigan.

KENNETH L. REHG is an Associate Professor in the Department of Linguistics at the University of Hawai‘i at Mānoa, where he serves as coordinator of the department’s activities in language documentation and conservation. His research interests include language documentation, Micronesian linguistics, phonology, lexicography, and the application of linguistics to the development of educational policies and practices in the developing nations of the Pacific. He is the founding Editor of the new on-line journal *Language Documentation and Conservation* and a member of the Linguistic Society of America’s Committee on Endangered Languages and their Preservation. He has extensive fieldwork experience in Micronesia and has served as a linguistic consultant to the departments of education in Hawai‘i, the Federated States of Micronesia, the Commonwealth of the Northern Mariana Islands, and American Samoa. He is currently working with colleagues on Pohnpei to produce a second edition of the Pohnpeian dictionary.

YIN-SHENG (DAVIS) TAI is an MA student in Linguistics in the Department of English Language, Literature, and Linguistics, Providence University. His research interests are in lexical semantics and Yami traditional songs.

CHIA-CHI (BETSY) YANG received her MA in English Language Teaching from the Department of English Language, Literature, and Linguistics, Providence University. Her research interest is in computational assisted language learning with a special focus on Yami e-Learning.

MENG-CHIEN YANG is an assistant professor of the Department of Computer Sciences and Communication Engineering, Providence University, Taiwan. His research interests are digital archiving, computerized tools for field linguists, and image processing.

ZHEN-YI (KAREN) YANG is an MA student in Linguistics in the Department of English Language, Literature, and Linguistics, Providence University. Her research interest is in sociolinguistic variation with a special focus on sociophonetics in Taiwanese languages.
