October 21, 1990

Mr. Duane Kanuha
Director
Planning Department
County of Hawaii
25 Aupuni Street
Hilo, Hawaii 96720

Dear Mr. Kanuha:

As required in the County of Hawaii Planning Commission's geothermal resources permit (GRP 89-1), we have enclosed five (5) copies each of the October, 1990 monthly report.

If you have any questions, please call me at 522-5620.

Sincerely,

A handwritten signature in cursive script that appears to read "Harry Olson".

Harry Olson
Hawaiian Electric Industries/
Spark Matsunaga Fellow in
Geothermal Energy Research

Enclosure: October monthly report

OCTOBER 1990 MONTHLY REPORT

Scientific Observation Hole (SOH) Program

Geothermal Resource Permit: GRP 89-1

Lilewa, Kapoho, and Halekamahina, Hawaii

TMK: 1-2-10:01; 1-4-01:02; and 1-4-02:32

Hawaii Natural Energy Institute

University of Hawaii

November 1990

SUMMARY

Drilling continued at SOH 1, throughout the month of October, 1990. At the beginning of the month the depth of the hole was at 3377 feet and the ending depth was 4181 feet, an interval of 804 feet. Drilling was impeded by poor drilling conditions, which included hard and highly fractured rock, short core runs and bit life, which resulted in extremely slow and expensive penetration rates. SOH 2 and SOH 3 remain in the permitting stage awaiting grading and grubbing permits to be issued by the County and State. During October, a six foot high fence was erected around the SOH 4 wellhead and is now in place.

I. INTRODUCTION

This document presents a monthly report to the County of Hawaii Planning Department to support the Scientific Observation Hole (SOH) program in the Kilauea Middle and Lower East Rift zones. The SOHs are for scientific observation purposes only and will not be flow-tested or produced. The information to be gained from the SOHs will provide an assessment of subsurface geological conditions, groundwater level and composition, temperature, drilling conditions, an inventory of possible mineral and geothermal resources, and an eruptive history of the island to the depth drilled.

This report addresses: occurrence and duration of any start-up, shut-down, and operation mode of any SOH/facility; performance testing, evaluation, calibration checks, and adjustment and maintenance of the continuous emission monitor(s) that have been installed; and emission measurements.

II. BACKGROUND

The County of Hawaii Planning Commission approved, on August 8, 1989, a geothermal resource permit application (GRP 89-1) to drill scientific observation Holes (SOHs) in the Kilauea middle and lower east rift zone. This document meets the requirement of GRP 89-1, condition 6:

"The petitioner shall maintain a record in a permanent form suitable for inspection and five (5) copies shall be filed with the Planning Department on a monthly basis during

drilling and for six (6) months after the completion of drilling to establish a hole specific baseline and such record shall be available to the community. The record shall include:

- a. Occurrence and duration of any start-up, shut-down, and operation mode of any SOH/facility.
- b. Performance testing, evaluation, calibration checks, and adjustment and maintenance of the continuous emission monitor(s) that have been installed.
- c. Emission measurements reported in units compatible with applicable standards/guidelines."

As planned, four holes are scheduled to be drilled along the Kilauea East Rift Zone on the Big Island of Hawaii. Three of the Big Island holes (SOHs 1, 2, and 4) are on agriculture land and have been permitted by the County of Hawaii Planning Commission. The fourth hole, designated SOH 3, is on conservation land and has been permitted by the State and the County. SOH activities under Conservation District Use Permit (HA 12/20/85 - 1830) issued to the Estate of James Campbell have been approved.

III. SOH 1 SITE

Drilling Activity

Tonto Drilling Services, Inc. continued drilling activities to a depth of 4181 feet for a penetration of 804 feet during this reporting period. The drilling penetration rate and bit life

remain low due to difficult drilling conditions, including highly fractured rock, caving problems and core barrel blockage.

Monitoring Program - Air Quality

The air quality monitoring station provides a continuous record of atmospheric H₂S concentrations when interfaced with a data logger or chart recorder. The unit is located in a utility container on-site. Power for the monitoring equipment is provided by the drill rig system.

This station operated normally throughout the month with only minor data breaks due to shut down of the drill rig for maintenance. Calibrations were routine and there were no major data gaps. Total data capture was 100% (see Appendix for details).

Monitoring Program - Meteorological

Continuous wind speed and directional measurements are being made with a recording wind speed/direction sensor system. A data logger and back-up pressure-sensitive recorder is being used to record wind speed and direction data. The unit is located in a utility container on-site and power is provided by the drill rig system.

This station operated normally throughout the month. Calibrations were routine and there were no major data gaps. Total data capture was 100% (see Appendix for details).

Monitoring Program - Noise

One noise monitoring station is located at the SOH 1 site during drilling. This station operated normally for the majority of the month with only minor loss of data due to mechanical problems.

A second noise station is located at the Laughlin residence, about a quarter mile west of the SOH 1 drill site. Instrument malfunction and loss of calibration made the consistency of results questionable. The instrument has been recalibrated and is currently operational.

A third noise monitoring station is installed at the Pommerenk residence, about a mile east of the SOH 1 site. This unit was removed for complete servicing on September 10, 1990. A weather/security box was built and the unit reinstalled October 5, 1990. This monitor is powered by solar charged batteries, which required adjustments, but now seems to be functioning normally.

Emissions Reports

An H₂S monitor is located on-site. The average H₂S level measured is about 1 ppb. The Colortek sensors show no indication of any emissions from the well.

IV. SOH 2 SITE

No drilling activity has been initiated. Ambient noise monitoring is being prepared for the SOH 2 site. Findings of the

VI. SOH 4 SITE

Drilling Activity

Drilling is completed and the hole is shut in at a depth of 6,562 feet. County of Hawaii landfill officials found the mud pit material unsuitable (too wet) for their uses and Department of Health officials have given approval to bury the material on-site. Planting of ohia seedlings from the DLNR nursery at the site is scheduled for the near future. A six foot fence erected around the wellhead.

Monitoring Program -

Air Quality, Meteorological, Noise and Emissions have been terminated at the site, as drilling activities are completed.

APPENDIX

Attn Arthur S. Seki

November 6, 1990

Dear Art,

This report covers the period Oct. 1, to Oct. 31, 1990.

GILMAN HAI. There was a 15 hour data loss on Oct. 7-8 due to running out of Lead Acetate tape. There was also a loss of 57 hours on Oct. 22-24 due to chart recorder jam. Also 3 hours was lost to minor power outages. A major component (Timer/Memory circuit board) became unstable and was discovered during routine maintenance and before there was any data loss. Installed the last available replacement board for this instrument. Now operating normally. Total data capture for October was 90%.

SOH-1 HAI. This instrument operated normally during the entire month with only minor data breaks due to shut down of the drill rig for maintenance. Calibrations were stable and required only minor adjustments. Total data capture was 100%.

WOODS HAI. Only 2 hours data was lost at this station during October because of a minor power outage. The instrument continues to operate normally, although it requires more frequent calibration adjustments than usual. Total data capture was 99%.

WOODS MET. There was a loss of 4 hours data for all parameters on Oct. 20 due to a power interruption at the translator housing. I believe that this was caused inadvertently by the residents. Both Temperature and Wind Direction are becoming increasingly unstable and it is doubtful that the sensors will continue to operate till the end of the year. Total data capture at this station was 99%.

T.P. MET. A substantial data loss at this station of 97 hours occurred on Oct. 15-19. The underlying reason for this much loss was a simple chart jam. When found, the chart recorder was repaired, but not sufficiently tested, so it promptly jammed again. Other than the chart recorder problem, all parameters at this station operated normally, and calibrations were routine. Total data capture was 87%.

SOH-1 MET. This station operated normally throughout the month. Calibrations were routine and there were no major data gaps. Total data capture was 100%.

SOH-4 COLORTEK. These cards were routinely replaced and did not give any indications of color change.

Enclosed:

H2S Data Reduction for Gilman, SOH-4 and Woods Stations
for October 1990.

Average, Maximum and total H2S for the above stations.

Meteorological Data Reduction for Woods, T.P., and SOH-1.
October 1990.

Synopsis of Woods and T.P. Met Data for October, 1990.

Copy of Station Logs, October, 1990.

October Invoice

SUPPLEMENTARY BILLING

J-276	Wednesday, 10-3-90	3.00
SOH-1	Operating normally.	
POMERINCK	Partially installed shelter for sound station. Too wet to install instruments, test and calibrate.	
LOUGHLIN	Operating normally.	
J-278	Friday, 10-5-90	3.00
SOH-1	Operating normally. Full calibration.	
POMERINCK	Relocated sound station shelter by request of the Pomerincks. Finished instrument installation, tested and calibrated. Station now on line.	
LOUGHLIN	Operating normally. Full calibration but no adjustments were required.	
COLORTEC	Replaced colortec cards. No color change visible.	
J-279	Monday, 10-08-90	2.00
SOH-1	Two chart jams. Cleared itself.	
POMERINCK	Operating normally. Inadvertantly left chart speed at 30 cm/hr instead of 2 cm/hr...reset.	
LOUGHLIN	Operating normally	
J-283	Wednesday, 10-10-90	3.00
SOH-1	Chart jammed twice, but cleared itself again.	38.05
POMERINCK	Operating normally. Installed and tested a power strip to control voltage from solar-panel to instruments and batteries.	
LOUGHLIN	Operating normally. Chart & pen O.K.	
J-285	Friday, 10-12-90	3.00
SOH-1	Pen ran dry. Some data lost. Ran full calibration. Replaced chart recorder with unit borrowed from SAIC to attempt to find out cause of jamming.	
POMERINCK	Operating normally. Ran full calibration. Replaced directional mike setup with omni-directional unit.	
LOUGHLIN	Operating normally. Ran full calibration.	
COLORTEC	Replaced Colortec cards. No visible color change.	
J-288	Monday, 10-15-90	2.00
SOH-1	Operating normally, renewed chart.	

POMERINCK
Operating normally, renewed chart.

LOUGHLIN
Pen ran dry. Lost some data. Renewed chart.

J-290 Wednesday, 10-17-90 2.00
SOH-1
Some data lost because pen ran dry.

POMERINCK
Operating normally

LOUGHLIN
Readings seem abnormally high. Meter was set on Fast, instead of slow response.

J-292 Friday, 10-19-90 3.00
SOH-1
Operating normally. Full calibration.

POMERINCK
Operating normally. Full calibration.

LOUGHLIN
Readings abnormally high. Replaced microphone and preamplifier. Full calibration. Normal at 110.0 db, but a zero at 60 db difficult because of high ambient.

COLORTEC
Replaced Colortec cards. No color change visible.

J-295 Monday, 10-22-90 4.00
SOH-1
Operating normally. Reinstalled our recorder which has been operating without a hitch for 10 day, and returned borrowed recorder to Ormat.

POMERINCK
Some data loss here because one of the sound meter batteries did not charge from the solar panel. Replaced battery and checked circuits. Everything seems normal.

LOUGHLIN
Very high readings but everything seems normal. Got some assistance from Kim Born and his spare meter and calibrator. Eventually found that the connecting cable between the meter and the microphone had gone dingy. Replaced cable, tested and calibrated...O.K. The readings with the defective cable were about 15 db above normal.

J-297 Wednesday, 10-24-90 2.00
SOH-1
Operating normally

POMERINCK
Operating normally but blew sound meter while checking solar panel & batteries. Station now inoperative.

LOUGHLIN
Operating normally but pen ran dry. Some data lost.

SOH-1

Operating normally. Ran full calibration.

POMERINCK

Installed sound meter that was borrowed from SAIC.

Our meter had to be sent to Quest for repair.

LOUGHLIN

Operating normally. Ran full calibration but no
adjustments were required.

COLORTEC

Replaced colortec cards. No visible color change.

J-302 Monday, 10-29-90 2.00

SOH-1

Operating normally,

POMERINCK

Operating normally.

LOUGHLIN

Operating normally.

J-304 Wednesday, 10-31-90 2.00

SOH-1

Chart jammed again. Exchanged recorders with Loughlin.

POMERINCK

Operating normally. Adjusted charge circuits.

LOUGHLIN

Operating normally. Exchanged recorders with SOH-1.

J-306 Friday, 11-2-90 3.00

SOH-1

Chart jammed, some data lost. Paper at fault, not
the recorder. Full calibration.

POMERINCK

Operating normally. Full calibration, no problems.

LOUGHLIN

Operating normally. Full calibration, no problems.

COLORTEC

Replaced colortec cards. No color change apparent.

J-275 Tuesday, 10-2-90
 Purchased Solar Panel, Misc. clamps, fittings and hardware.
 Prepared cables and tested.

J-276 Wednesday, 10-3-90
 SOH-1 0830 Clouds 100%, rain WS&DIR 280 @ 2-3
 Operating normally. No problems.
 LOUGHLIN 0940 Clouds 100%, rain WS&DIR 300 @ 2-3
 Operating normally. No problems.
 POMERINCK 0900 Clouds 100%. rain WS&DIR 300 @ 2-3
 Installed instrument shelter, shelter stand and batteries.
 Too wet to attempt to install and calibrate instruments.

J-278 Friday, 10-5-90
 SOH-1 0820 Clouds 60% WS&DIR 315 @ 3-4
 Operating normally. Replaced pen. Calibrated sound meter
 to 110.0 from 109.7. No adjustments required for recorder.
 POMERINCK 0900 Clouds 60% WS&DIR 340 @ 5-7
 Relocated shelter to top of hill as requested by Mrs.
 Pomerinck. Installed instruments, Solar-panel and
 batteries. Tested and calibrated.
 LOUGHLIN 1010 Clouds 40% WS&DIR 350 @ 8-10
 Operating normally. Ran full calibration. No adjustments
 required for either meter or recorder.

J-281 Monday, 10-8-90
 SOH-1 0825 Clouds 50% WS&DIR 300 @ 2-3
 Two jams during the weekend. Some data lost. Jams cleared
 themselves.
 POMERINCK 0905 Clouds 60% WS&DIR 315 @ 3-4
 Operating normally except that I left the recorder
 running at 30 cm/hr inadvertently. Replaced chart.
 LOUGHLIN 0925 Clouds 70% WS&DIR 325 @ 3-4
 Operating normally. Chart & pen O.K.

J-283 Wednesday, 10-10-90
 SOH-1 0830 Clouds 75% WS&DIR 340 @ 2-3
 Two jams, but recorder cleared itself again.
 POMERINCK 0852 Clouds 40% WS&DIR 350 @ 8-10
 Operating normally. Installed power-strip to control
 power from solar-panel to batteries & instruments.
 LOUGHLIN 0945 Clouds 50% WS&DIR 10 @ 8-10
 Operating normally. Chart & Pen O.K.

J-285 Friday, 10-12-90
 SOH-1 0847 Clouds 80% WS&DIR 20 @ 5-6
 Pen ran dry but no jams. Installed chart recorder
 borrowed from SAIC. Full Calibration. Adjusted meter
 to 110.0 from 100.2. Adjusted recorder zero & span.
 Replaced pen.
 POMERINCK 0936 Clouds 50% WS&DIR 40 @ 8-10
 Operating normally. Replaced directional Mike with
 Omni-directional cage. Full calibration. Meter to
 110.0 from 110.3. Adjusted recorder down 1 db.
 Checked solar panel and adjusted charge to batteries.
 LOUGHLIN 1045 Clouds 60% WS&DIR 50 @ 8-10
 Operating normally. Full calibration. No adjustments
 required for meter or recorder.

J-288 Monday, 10-15-90
 SOH-1 0820 Clouds 60% WS&DIR 300 @ 2-3
 Operating normally. Renewed chart.
 POMERINCK 0850 Clouds 60% WS&DIR 320 @ 3-5
 Operating normally. Renewed chart. Batteries O.K.
 LOUGHLIN 0930 Clouds 60% WS&DIR 330 @ 3-5
 Operating normally, but pen ran dry. Replaced pen
 and renewed chart.

NOTE...

The recorder that was removed from SOH-1 has been running continuously since Friday without a jam or problem of any kind. I will continue to run the recorder on the test bench until something happens.

- J-290 Wednesday, 10-17-90
- SOH-1 0845 Clouds 100%, rain WS&DIR 330 @ 2-4
Normal operation except that pen ran dry. Replaced.
- POMERINCK 0910 Clouds 100%, rain WS&DIR 300 @ 2-4
Operating normally. Readings include farm tractor noise.
Drill site and pad clearing noise inaudible or masked.
- LOUGHLIN 0940 Clouds 100% WS&DIR 300 @ 2-4
No readings less than 40db in past 48 hours. Also found meter set on FAST response instead of on SLOW. Reset and tested, but readings still seem high.
- J-292 Friday, 10-19-90
- SOH-1 0845 Clouds 95%, rain WS&DIR 50 @ 5-7
Operating normally. Serviced batteries and Solar panel.
Full calibration. Adjusted meter to 110.0 from 109.7.
Slight increase adjustment for recorder.
- POMERINCK 0915 CLOUDS 100% WS&DIR 60 @ 4-6
Operating normally. Full calibration. Adjusted meter to 110.0 from 110.2. Did not adjust recorder although zero is 1/2 db down from chart zero.
- LOUGHLIN 1045 Clouds 90% WS&DIR 95 @ 3-5
Readings seem very high. Full calibration. Adjusted meter to 110.0 from 109.7. Difficult to obtain zero on chart recorder because of high ambient level (around 60 db).
I replaced microphone and pre-amp, but this made no difference. I believe something is wrong.
- J-295 Monday, 10-22-90
- SOH-1 0820 Clouds 40% WS&DIR 340 @ 4-5
Operating normally. Replaced the borrowed recorder with our recorder which has operated without a hitch for 10 days.
- POMERINCK 0920 Clouds 30% WS&DIR 360 @ 5-7
Recording a practically straight line, no mike response.
Extensive testing of all components revealed no problem until I checked the batteries as a last resort. One of the batteries for the sound meter was practically dead.
I don't know why this battery didn't charge. Replaced the battery and restored normal operation. Re-calibrated the meter and chart recorder.
- LOUGHLIN 1020 Clouds 50% WS&DIR 20 @ 6-8
Average readings here 65-70 db. Calibration was fine at 110.0 db, but could not obtain a zero at 60 db. Everything seemed O.K. Contacted Kim Born from Ormat to give me a hand with his model 2800 and calibrator. Without going into detail about everything we did, the bottom line is that our readings were about 15 db higher than what his meter indicated. The problem turned out to be in the cable between the mike and the meter. When I replaced the cable, readings returned to normal and I was able to obtain a good zero and 110.0. Normal operation has been restored now, but I don't know for how long the previous data should be considered suspect.

J-297 Wednesday, 10-24-90
SOH-1 0810 Clouds 50% WS&DIR 295 @ 4-5
Operating normally. Chart & Pen O.K.
POMERINCK 0835 Clouds 70% WS&DIR 360 @ 4-5
Operating normally. While checking solar panel and batteries, I accidentally shorted out the leads going to the sound meter. Apparently, this blew the meter. Removed meter for check and repair. Station now inoperative.
LOUGHLIN 1010 Clouds 80% WS&DIR 20 @ 3-4
Operating normally but pen ran dry. Replaced pen.

J-299 Friday, 10-26-90
SOH-1 0805 Clouds 80% WS&DIR 350 @ 5-6
Operating normally. Replaced chart & Pen. Ran full calibration. Meter adjusted to 110.0 from 109.3. Also made a slight increase adjustment on recorder.
POMERINCK 0845 Clouds 50% WS&DIR 360 @ 5-6
Installed sound meter borrowed from SAIC. Our meter was sent to Quest for repair. Ran full calibration of meter and recorder. Checked solar panel and batteries.
LOUGHLIN 0940 Clouds 40% WS&DIR 300 @ 3-5
Operating normally. Full calibration. Sound meter O.K. at 110.0, and no adjustment required for chart recorder.

J-302 Monday, 10-19-90
SOH-1 0820 Clouds 100%, rain WS&DIR 275 @ 2-4
Operating normally. No problems
POMERINCK 0850 Clouds 100% WS&DIR 280 @ 2-4
Operating normally. Checked batteries & Solar panel.
LOUGHLIN 0923 Clouds 90% WS&DIR 280@ 2-4
Operating normally. No problems.

J-304 Wednesday, 10-31-90
SOH-1 0815 Clouds 50% WS&DIR 270 @ 2-3
Chart jammed. Decided to exchange recorder with the one at Loughlins. Replaced pen.
POMERINCK 0840 Clouds 30% WS&DIR 280 @ 4-5
Operating normally. Adjusted charge circuits.
LOUGHLIN 0915 Clouds 30% WS&DIR 290 @ 4-5
Operating normally. Exchanged recorders with SOH-1.

J-306 Friday, 11-2-90
SOH-1 0820 Clouds 100%, rain WS&DIR 70 @ 2-3
Chart jammed. Some data lost. Chart paper at fault not chart recorder. Full calibration. Adjusted the sound meter to 110.0 from 110.3. Recorder was O.K.
POMERINCK 0915 Clouds 100 % WS&DIR 80 @ 2-3
Operating normally. Renewed chart, pen O.K.
Full calibration. Sound recorder O.K. @ 110.0
Recorder was 3db high. Checked solar panel and batteries.
LOUGHLIN 1000 Clouds 90% WS&DIR Calm
Operating normally. Renewed chart, pen O.K.
Full calibration. Adjusted meter to 110.0 from 110.2. No adjustments to recorder.
