Lieutenant Colonel Donald T. Wynn
District Engineer (PODCO-O)
U.S. Army Corps of Engineers
Building 230
Fort Shafter, Hawai'i 96858

Dear Lt. Col. Wynn:

PODCO 2148
Kawela Bay Desilting Project
Kahuku, O'ahu

The Environmental Center reviewed the Draft EIS for this project on April 9, 1990. Numerous inconsistencies were discovered in the EIS along with other general planning problems which are discussed in the enclosed copy of our review. As a consequence of the inadequacy of the DEIS, we recommended that extensive revisions and additional studies be performed. Until the issues raised in our review of the DEIS are resolved, we feel that issuance of the requested permit from the U.S. Army Corps of Engineers would be inadvisable.

Yours truly,

John T. Harrison, Ph.D.
Environmental Coordinator
