

Call for Papers for Special Issue of LLT

Theme: Technology and oral language development

Guest Editor: David Nunan

The articles in *Language Learning and Technology* generally report on research studies and present theoretical discussions of how technology can be used to facilitate language learning. The focus of this special issue is technology and oral language development. We encourage submissions reporting on studies that look at the impact of the use of computers, the Internet, and other new technologies that may include everything from traditional CALL programs to online communication, on students' oral language development.

Possible topics include, but are not limited to

- comparative investigations of face-to-face and online instruction
- using technology to enhance oral communication in face-to-face instruction
- effects of computer-mediated collaboration on oral language development
- intercultural communication in the online conversation class
- the negotiation of meaning and uptake in the online conversation class
- affective aspects of the online conversation class
- educating teachers in conducting online conversation classes
- technology and the assessment of oral language development
- technology for pronunciation training, including sentence-level and discourse-level intonation

Please send an e-mail of intent with a 250-word abstract by December 31, 2003, to llt-editors@hawaii.edu

Full papers will be due by July 30, 2004.
