This table may be used to fix the day of the week on which any day in 1968-71 falls. Thus, if we require the day of the week for July 10, 1970, we see that July 1 is Wednesday; July 8 must also be Wednesday and so July 10 is Friday.

**CONVERSION TABLES**

The bold figures in the central columns can be read as either the metric or the British measure. Thus 1 metre = 1.09 yards; or 1 yard = 0.91 metres.
