

OVERFISHING IN THE ARCTIC OCEAN

By Dylan Charter
and Jill Harter-Foist

Then

1950- 4.9 billion pounds of fish were caught in the U.S (152,3 million people is population)

Now

2015- 9.7 billion pounds of fish were caught in the U.S (320.7 million people is population)

Today, one person eats on average 19.2kg of fish a year

Orange Roughy (Endangered)

In 2013 93 million tonnes of fish were caught world-wide

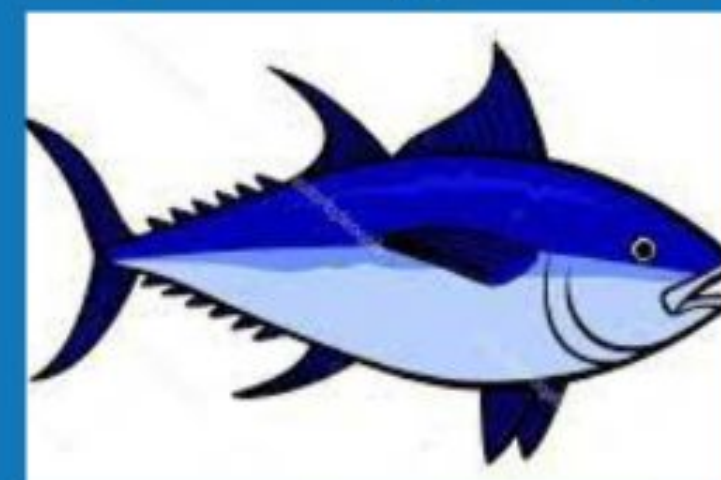

King Salmon (Endangered)

Yellowfin Tuna (Endangered)

The world's oceans will be emptied of fish by 2048

Bluefin Tuna (Endangered)

30% of fish stocks commercially fished are over-fished

What Next?

Illegal fishing still occurs in the Arctic Ocean, however, five countries have agreed to stop sending fishing vessels to the area in July 2015. The countries included are Canada, Greenland, Norway, Russia, and the United States.
