GEOHERMAL/CABLE
PERMIT CENTER

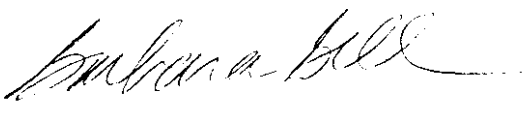

Dear Mr. Paty;

Enclosed is the current list of 72 parcels and landowners who are applying to withdraw their properties from the Kapoho and Kamaili Geothermal Resource Subzones. This application covers almost 700 acres.

These landowners are very concerned about the potential adverse effects of geothermal development including potential adverse health effects, land use compatibility, notification procedures, groundwater contamination, property devaluation, the inclusion of buffer zones, and the possible destruction of the geothermal wells by volcanic activity or earthquakes leading to permanent "open venting" of poisonous hydrogen sulfide gas which contains 900 ppm H₂S (twice the level that can kill a person).

We will be submitting additional information to reinforce this application shortly.

Sincerely yours,

Barbara Bell
Acting President Kapoho Community A
Association
965-7119
