**Demilitarized Areas**

Mark  
6.30-9.1'

Crestone "islands" are banks -

some do not even break water at low tide.  
some are drying reefs

Are any above water at high tide? Mark  
isn't sure.

None are islands under common understanding.

Dzulek says China's nearest island generate  
zone that covers Crestone. [some, but not all]  
& Natural Prolongation of US is broken.
