Mr. Jack P. Huizingh
Executive Director
Natural Energy Laboratory of Hawaii
220 South King Street, Suite 1280
Honolulu, Hawaii 96813

Dear Mr. Huizingh:

Cooperative Environmental Monitoring Program (CEMP)
Hawaii Ocean Science and Technology Park
Natural Energy Laboratory of Hawaii

The objectives of this CEMP is to provide information necessary to comply with the conditions of various regulatory agencies which govern the activities at Keahole Point and to assure that the water quality of the affected environment is protected. This review was conducted with the assistance of Jacquelin Miller and C. Anna Ulaszewski, Environmental Center.

General Comments

After reviewing this draft of the CEMP and comparing it with the draft dated July 18, 1988, we recognize that a number of improvements have been made. We do not have any major concerns regarding this present draft; however, we would like to offer a suggestion concerning Section 3, Baseline Data.

This section discusses both baseline data and criteria/standards for each of the parameters of concern. Summary tables of the baseline data have been included in Appendix A. It would be helpful if the criteria/standards were likewise summarized and presented in table form.

Thank you for the opportunity to comment on this Draft Cooperative Environmental Monitoring Plan. We hope our comment will be helpful in preparing the Final Plan.

Yours truly,

John Harrison
Environmental Coordinator
