

RG:0025

December 22, 1975

MEMORANDUM

TO: Manoa Chancellor

FROM: Doak C. Cox

SR 357

We report as follows on the status of response to SR 357 "Requesting DOH reconsideration of its conservation standards":

This resolution requests the Department of Health to reconsider its conservation standard in the light of proposals of the Hawaii Environmental Simulation Laboratory and in consultation with the Environmental Center of the University of Hawaii.

The proposals of the Hawaii Environmental Simulation Laboratory for sedimentation evaluation and conservation standards pertinent thereto have been reformulated in consultation with the Environmental Center and the Department of Health and distributed widely for review. County ordinances pursuant to the Department of Health regulation relating to the standards have been or are being developed in accordance with the proposals of the Laboratory in anticipation of revision of the standard.
