August 4, 1995

MEMORANDUM

TO: Hiram Young, Section Head
Mineral Resources Section
Division of Water and Land Development

FROM: Dean A. Nakano, Geothermal Program Manager *DN*

SUBJECT: Geothermal Geographical Information System (GIS) Data Files

As requested, we are transmitting a listing of GIS data files pertaining to the Geothermal Resource Subzones (GRS) located on the Island of Hawaii. The data files contain GIS-based information on Tax Map Keys (TMK), and vegetation types found within and adjacent to each designated subzone.

The attached listing represents all of the subzone-related data currently stored in the Information & Communication Services Division's (ICSD) GIS system. The 1995 information resides in the GIS system under the area assigned to "Energy:Mike." Information generated prior to 1995 (e.g. statewide rainforest analysis and lava flow data) is stored on DAT backup tapes on file with ICSD.

We have attached an EDP Request Form for your use in requesting backup copies of all of the subzone data currently stored in the GIS system. We will be happy to work with you to arrange any details necessary to execute the transfer of the requested information to your department. Should you have any questions concerning the specific contents of the data files, please contact Mr. Michael Robinson in Hilo at (808) 935-8291.

I am pleased that this information will be useful to your geothermal program and regulatory requirements. If we can be of any further assistance, please do not hesitate to contact me at 586-2353.

Enclosures

c: Mike Robinson
