

CALOPHYLLUM INOPHYLLUM

Leptynoptera sulfurea Crawford. A delicate psyllid common on young leaves.

TERMINALIA CATAPPA

Thiotricha strophiacma Meyr. A minute whitish moth whose larvae feed beneath shields which they have cut from the leaf, leaving neat perforations in the blade of the leaf.

Adoretus versutus Harold. A nocturnal scarabeid beetle feeding extensively on the leaves.

COLEUS

Psara stultalis (Walk.). An abundant leafroller.

AGERATUM CONYZOIDES

Homoeosoma ephestidiella Hamps. A small gray phycitid moth whose larvae feed in the flower heads.

Spathulina acroleuca Schiner. A pretty little trypetid fly whose larvae feed on the growing seeds in flower heads.

Records of Immigrant Insects for the Year 1940

BY THE EDITOR

In this issue of the Proceedings, the following immigrant species are recorded for Hawaii. Those marked with an asterisk were observed for the first time at the date mentioned in 1940. The others were previously observed or known but not yet identified. For details of records, etc., refer in the text to the pages as given.
