

UH Online 5-Week Professional Development (PD) Program Evaluation and Iterative Improvements

The UH Online 5-Week PD Program was launched in 2018 (aligned to UH's strategic directions) to support faculty across the system with developing online courses in an accelerated, 5-week format.

Program Evaluation Goals

1. Determine strengths
2. Identify weaknesses
3. Redesign program for 2021 summer cohort

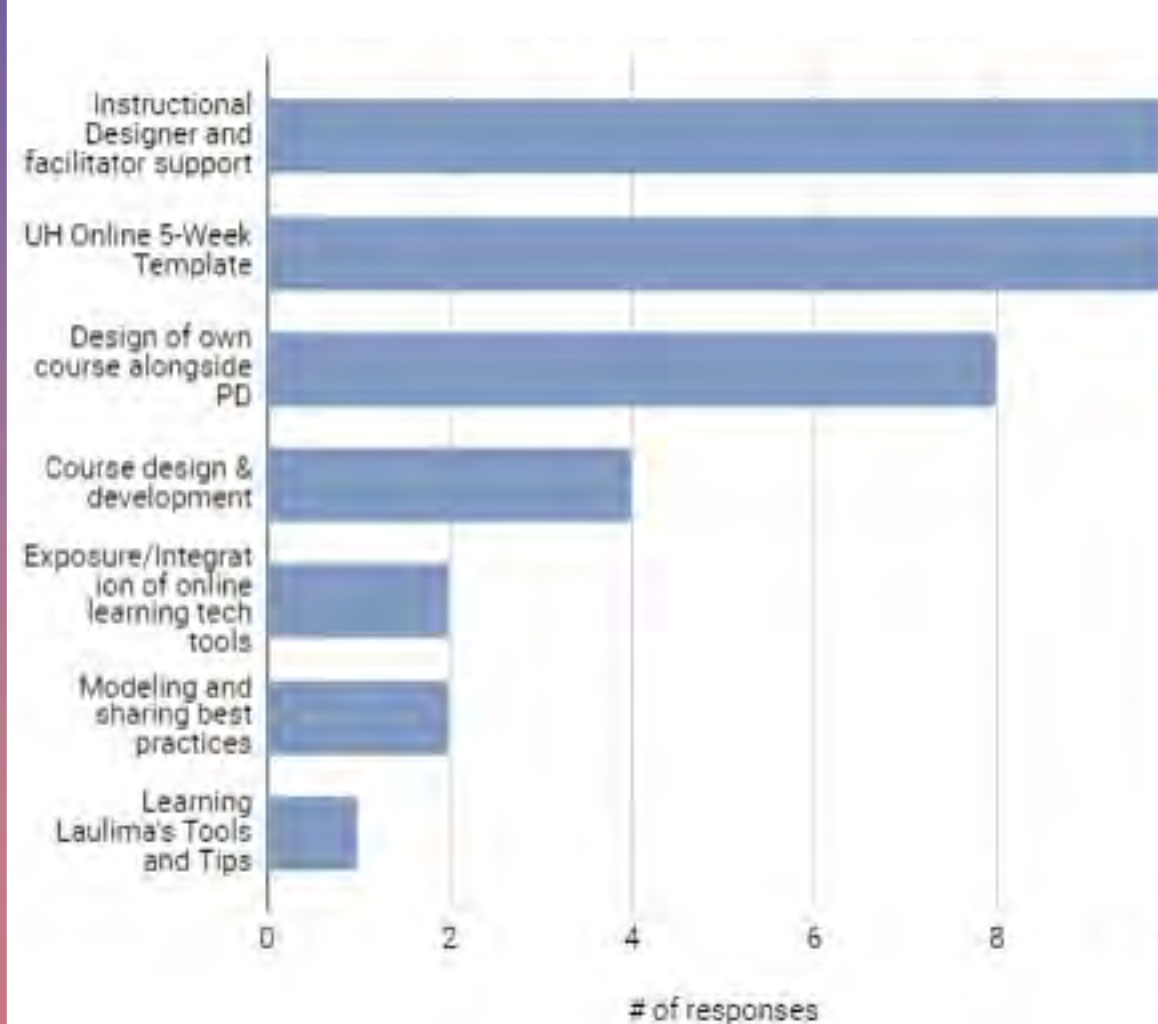

Design Thinking Framework

Results/Findings

The greatest strength of the PD program was the instructional designer and facilitator support alongside the implementation of the UH Online 5-Week Laulima learning management system course template. Participants identified learning Laulima's tools and tips as an area that could be improved upon.

Select the greatest strength of the PD Program

Which of the following needs to be improved in the PD?

n=37 responses (from 2018, 2019, and 2020 cohorts)

Successful Strategies

- Incorporate pre-populated response choices based on previous cohort data into this program survey.
- Keep timeline flexible for unexpected circumstances.
- Collaborate with others to incorporate different perspectives during the process.

Action Plans/Next Steps

1. Implement revisions and collect data during 2021 UH Online 5-Week PD Program.
2. Engage in future publications.
