Gentlemen:

**Installation Restoration Program
Phase II - Confirmation/Quantification Stage 1 for
Hickam and Wheeler Air Force Bases
Oahu, Hawaii**

The Environmental Center has reviewed the Restoration Program with the assistance of Lewis Morris, U.H. School of Public Health; Reginald Young, Civil Engineering; and Scott Derrickson, Environmental Center.

The field and analytical results are consistent with the presented data therefore, the recommendations should be implemented. Should implementation of the recommendations provide any new material, then further review with attention to the new information would need to be conducted.

Our review did note that Appendix J in the Hickam Air Force Base document was written for Wheeler Air Force Base.

We wish to commend the quality and thoroughness of these documents. We hope our comments will be of some assistance and we thank you for the opportunity to review your plans.

Sincerely,

Jacquelin Miller
Acting Associate Director
