The Coastal Society-

Wave Energy - & Unintended Effects:

Many buoys - nearshore - 200 - couple of square miles → produced 50 megawatt

Impact on sand transport, water transport

Not less than 40 meters in depth.

Start up companies want to be bought up by the big guys

New pelagic habitat will be created - on the anchors of the buoys.

Cables may entangle turtles?

Fouling on cables? Paints as anti fouling efforts -

1000 megawatts a major plant

Sea Birds - Lighting at night - will attract birds

some lighting is needed to avoid navigational collisions.

48 to 1 Oregon power is from hydro

Marine Mammals -

gray whales migrating - could be caught in the array -

What if buoy breaks loose & sinks -

Andy Reed Duke - Comes to Hawaii & Mid-Pacific students -

Acoustics - lines will make noise

Electromagnetic fields

How many buoys are too much.

Anchors weigh 140 tons?!
20 x 20 x 10 concrete block

Dolan Eversole - Impact of Sealevel rise for Hawaii
1 meter rise this century - we are planning for that!
3°C temperature rise in a century
Within 5-10 yrs, we will agree on the rise -
People are agreeing with Jim Hansen -
Sea level is rising - 3mm/yr.
Hansen is predicting 2 meter sea level rise -
At end of last ice age, sea level rose at 8 mm/yr -

0.5 Alpine, ice caps 0.5
7.2 m Greenland
5-6 m W. Antarctic
Thermal expansion may account for 50 % of future sea level rise.
Greenland is washing away -

Bulges of warm water pass thru Hawaii & we notice 1 foot sea level rise leading to localized erosion -
4 yrs ago - severe erosion event in W Maui - tides were high, resulting from eddys -

Kristen Whiting-Grant, Maine
Access to Coast
Maine (& Mass) = Low water State -
no public access above low tide -
Preserve the cultural access.

{Rita Hines / Hynes
Head of Maine Center}

Matt Pecoy
10:52 Public Trust Doctrine in S. Carolina -
Do property owners benefit from beach renourishment -
It's not a "taking" in SC to prevent a landowner
from bldg devices to protect shoreline property -
Dock ominiums
Submerged lands leasing program -
Public trust doctrine - Shield & sword
protects against

11:10 - Rich McLaughlin - Gulf of Mexico
Gulf of Mexico - toilet bowl of the nation -
worse this year because of flooding -
Energy industry has a veto power over Gulf decisions
Federalists, States rights & private rights are imp.
in Gulf
Finality vs - Flexibility (Adaptive Mgmt)
Is "how do we avoid litigation"

University of Hawaii School of Law Library - Jon Van Dyke Archives Collection

Dolan Eversole

We were 3 miles from overflowing Ala Wai

Coastal erosion:

100 ft recession for 1 foot sea level rise -
Chip Fletcher -

1 m sea level rise = 100 - 150 feet of horizontal change -

Kauai - 70 x annual erosion rate + 40 feet -

Megan Higgins

1 cm of sea level rise = 1 meter of lost beach
RI - houses moved back 50 feet & are still being threatened (on S. Shore).

Rolling easement.

3-5 ft freeboard req't - stilts

Public nuisance - Seott of City of Del Mar
58 Cal App 4th 1296 (App 1997)

Texas Open Beaches Act - rolling easement -
part of background principles of State law
