How We Laulima

The staff at Edwin H. Mookini incorporate the theme Laulima in various avenues:

- Committee Collaboration across departments ensures decisions are informed by multiple perspectives - leading to more effective and meaningful outcomes. Every member has a voice and can kōkua.
- Engaging in professional development builds our communication skills and openness with each other, which helps to break down silos. Not only are our Staff Development events informative and educational, it also helps to promote a healthy work environment amongst co-workers and to offer opportunities to network:
- *"Professional development can provide many opportunities for networking. Workshops, conferences, classes, and webinars are all spaces in which professionals can meet new people within their industry and make new connections. These connections can lead to new opportunities, mentorship, and support which may provide the next stepping stone in your career."*

- We try our best to promote open communication. By having some shared responsibilities, the staff and librarians coordinate efforts help enhance frontline services within the library and projects or initiatives behind the scenes.
